SHEIKH OF SIALKOT

COMPANY PROFILE

FOUR DECADES OF CRAFT, TRUST AND INNOVATION.

ABOUT US

Sheikh of Sialkot Pvt. Ltd. (SOS) was founded in 1981 in Sialkot, Pakistan. We began as a leather manufacturing enterprise. Over time, many of our customers sought a manufacturing partner capable of producing both leather and textile products. In response, we invested in textile manufacturing and broadened our capabilities to include a wide range of woven and non-woven apparel.

Today, SOS is a trusted global manufacturing partner, delivering textile garment solutions for leading international brands

FROM 1981 TO TODAY

Sheikh of Sialkot began as a family business. Over four decades, we've evolved into a global apparel manufacturer while maintaining our commitment to quality, innovation, and sustainability.

40+
YEARS OF EXCELLENCE

350,000+
GARMENTS/MONTH

OUR MISSION

Our mission is to build lasting partnerships by serving every customer with sincerity, integrity, and unwavering commitment. We deliver reliable, high-quality, and sustainable solutions while earning trust through consistent performance and exceptional service.

OUR VISION

We aspire to build enduring partnerships, protect the environment through responsible operations, and empower our workforce by creating opportunities that enhance their well-being, livelihoods, and quality of life.

ETP PLANT

Pioneering sustainable manufacturing, our facility houses the city's first state of the art biological water treatment plant. Through a multi-stage biological treatment and recycling system, we achieve 100% process water recovery and reuse minimizing environmental impact while protecting marine ecology, groundwater resources, and public health

SUSTAINABLE WASHING

At SOS, we are committed to responsible denim finishing through advanced washing technologies and improved process control. Our modern washing systems help reduce water usage through optimized wash cycles, controlled chemical dosing, and efficient rinsing processes. This allows us to achieve desired denim effects while minimizing water consumption. This helps reduce energy consumption and supports lower-impact production

SOLAR ENERGY

Complementing this initiative, our solar power infrastructure provides clean, renewable energy that reduces operational costs, lowers carbon emissions, and supports environmentally responsible manufacturing for a more sustainable future.

25%

RENEWABLE ENERGY BY 2030
